Use-Case Specification: Thumbnail View

1. Thumbnail View

1.1 Brief Description

The Use Case “Thumbnail View” is accessible for every kind of user group. Hereafter the actor will be called “Spectator”. The spectator will be able to view pre-generated thumbnails of the pictures he wants to look at.

2. Flow of Events

You will find the latest version of the activity diagram under the following link:

<http://photress.it.dh-karlsruhe.de/?p=46>

3. Special Requirements

N.a.

4. Preconditions

The spectator has to request the gallery of an activated user. Additionally, for viewing thumbnails this user has to have images uploaded in his gallery.

5. Postconditions

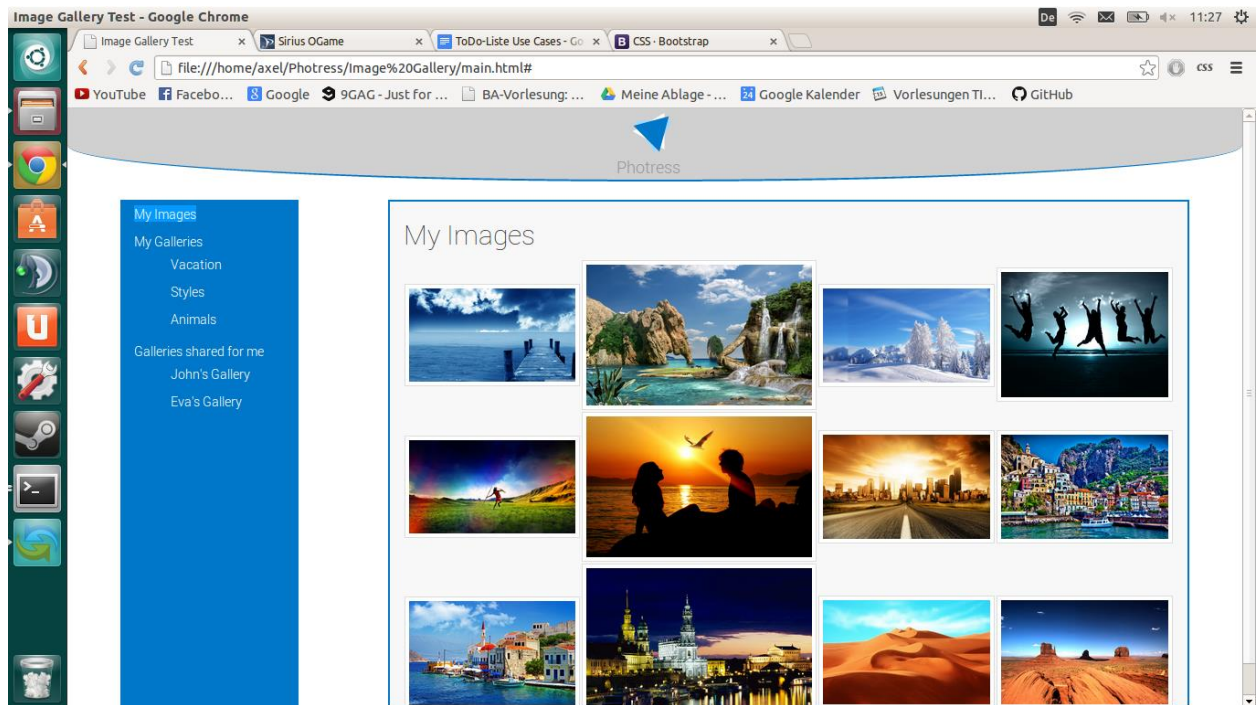

The spectator will see a generated gallery on the website with thumbnails of pictures the user has uploaded.

6. Extension Points

N.a.

Photress	Version: <1.1>
Use-Case Specification: Thumbnail View	Date: 31.10.2013

7. Mockup

8. Narration

Feature: Thumbnail_view

As a visitor (or any other defined role)
I want to see small previews of images
In order to get an overview of the images

Scenario: Gallery is displayed in Thumbnail-view-mode
 Given I click on the link to the gallery
 And Gallery uses thumbnail view
 And Gallery contains any visible images
 And the container holding the thumbnails has got id "container"
 When the page finishes rendering
 Then "#container" contains img-tags showing the thumbnails

Scenario: No images available
 Given I click on the link to the gallery
 And Gallery uses thumbnail view
 And Gallery does not contain images
 And the container holding the thumbnails has got id "container"
 When the page finishes rendering
 Then "#container" contains "No Images available"
